What's New in the?

Markup Assist is a new markup tool that allows designers and drafters to apply their own customized icons or text to drawings. Designers can directly import vector icons, block reference, and preset logos in editable text, so they can apply those symbols, colors, and logos to their own drawings. (video: 2:08 min.) • Fully editable vector icons and text: Designers can resize and reposition icons and text at any time during the design process. (video: 1:16 min.) • Auto-configure from other software applications: Designers can import design elements and symbols created in other software. In addition to symbols and designs used for engineering applications, such as AutoCAD and Creo, designers can add symbols, text, and designs from other software programs to create customized symbols and text. • Instant editing: For tasks like inserting new symbols and text or creating new rows and columns, you no longer need to import the symbols and text first. You can also add entire blocks of text and symbols directly. (video: 2:28 min.) • Mass editing: You can now remove symbols and text and their associated text from multiple rows and columns at once. You no longer need to import the symbols and text and edit them separately. (video: 1:19 min.) • Instant references: You no longer need to search through the symbol library to locate the reference you need. You can now easily add drawing elements, such as text and blocks, directly to a drawing using direct entry. (video: 2:07 min.) Drafting Manager: • Drafting Manager contains all of the previously separate Drafting Menu commands, and you can access them by moving to the View Toolbar, then clicking the Drafting Manager button. (video: 1:13 min.) • Drawing views: You can now access all of the Drafting Menu commands in any view. You can quickly access the commands from top to bottom, left to right, or any combination of the two. (video: 1:03 min.) • Drafting Manager improvements: Improved usability, search, and quick access to commands and commands by drawing areas. (video: 1:02 min.) • Reorganized tools: You can now access all of the Design and Drafting tools in the bottom bar. (video: 1:10 min.) • New properties: The Properties Palette now provides access to a full range of properties
